HEALTH

PROBLEM STATEMENT

Maternal sepsis is a leading cause of preventable morbidity and mortality. Variability in policies, procedures, and discharge instructions may delay identification and treatment. Standardization is needed to support early recognition and timely care.

FOCUS AREA

Standardizing and updating policies, procedures, and discharge instructions

Improving early recognition of maternal infection and sepsis

KEY INTERVENTIONS

- ✓ Updated policies and procedures
- ✓ Revised discharge instructions with clear symptoms
- ✓ Standardized patient education with sign-off
- ✓ Staff education completed
- ✓ Routine chart audits implemented

STATUS & MEASURES

All relevant policies and procedures updated
Discharge instructions revised and implemented
Reviewed with each patient and documented acknowledgment
100% compliance sustained since January 2026

RESULTS

100% compliance with patient education and documentation
Sustained performance since January 2026
