

The PA PQC recommends to consider one of the following validated SUD screening tools:

4Ps  
4Ps Plus©  
5Ps<sup>1</sup>  
NIDA Quick Screen<sup>2</sup>  
Substance Use Risk Profile Pregnancy (SURP-P) Scale  
CRAFFT (for adolescents)  
Wayne IDUS  
DAST-10  
Prenatal Risk Overview-Drug Use (PRO)

<sup>1</sup> If providers elect to use the “[Institute for Health and Recovery Integrated Screening Tool](#)” (which is also known as the “Integrated 5Ps Screening Tool”), this includes the 5Ps.

<sup>2</sup> A positive response on the [NIDA Quick Screen](#) leads into the NIDA-Modified ASSIST. (It is a two-step screening process.)
