

Problem Statement

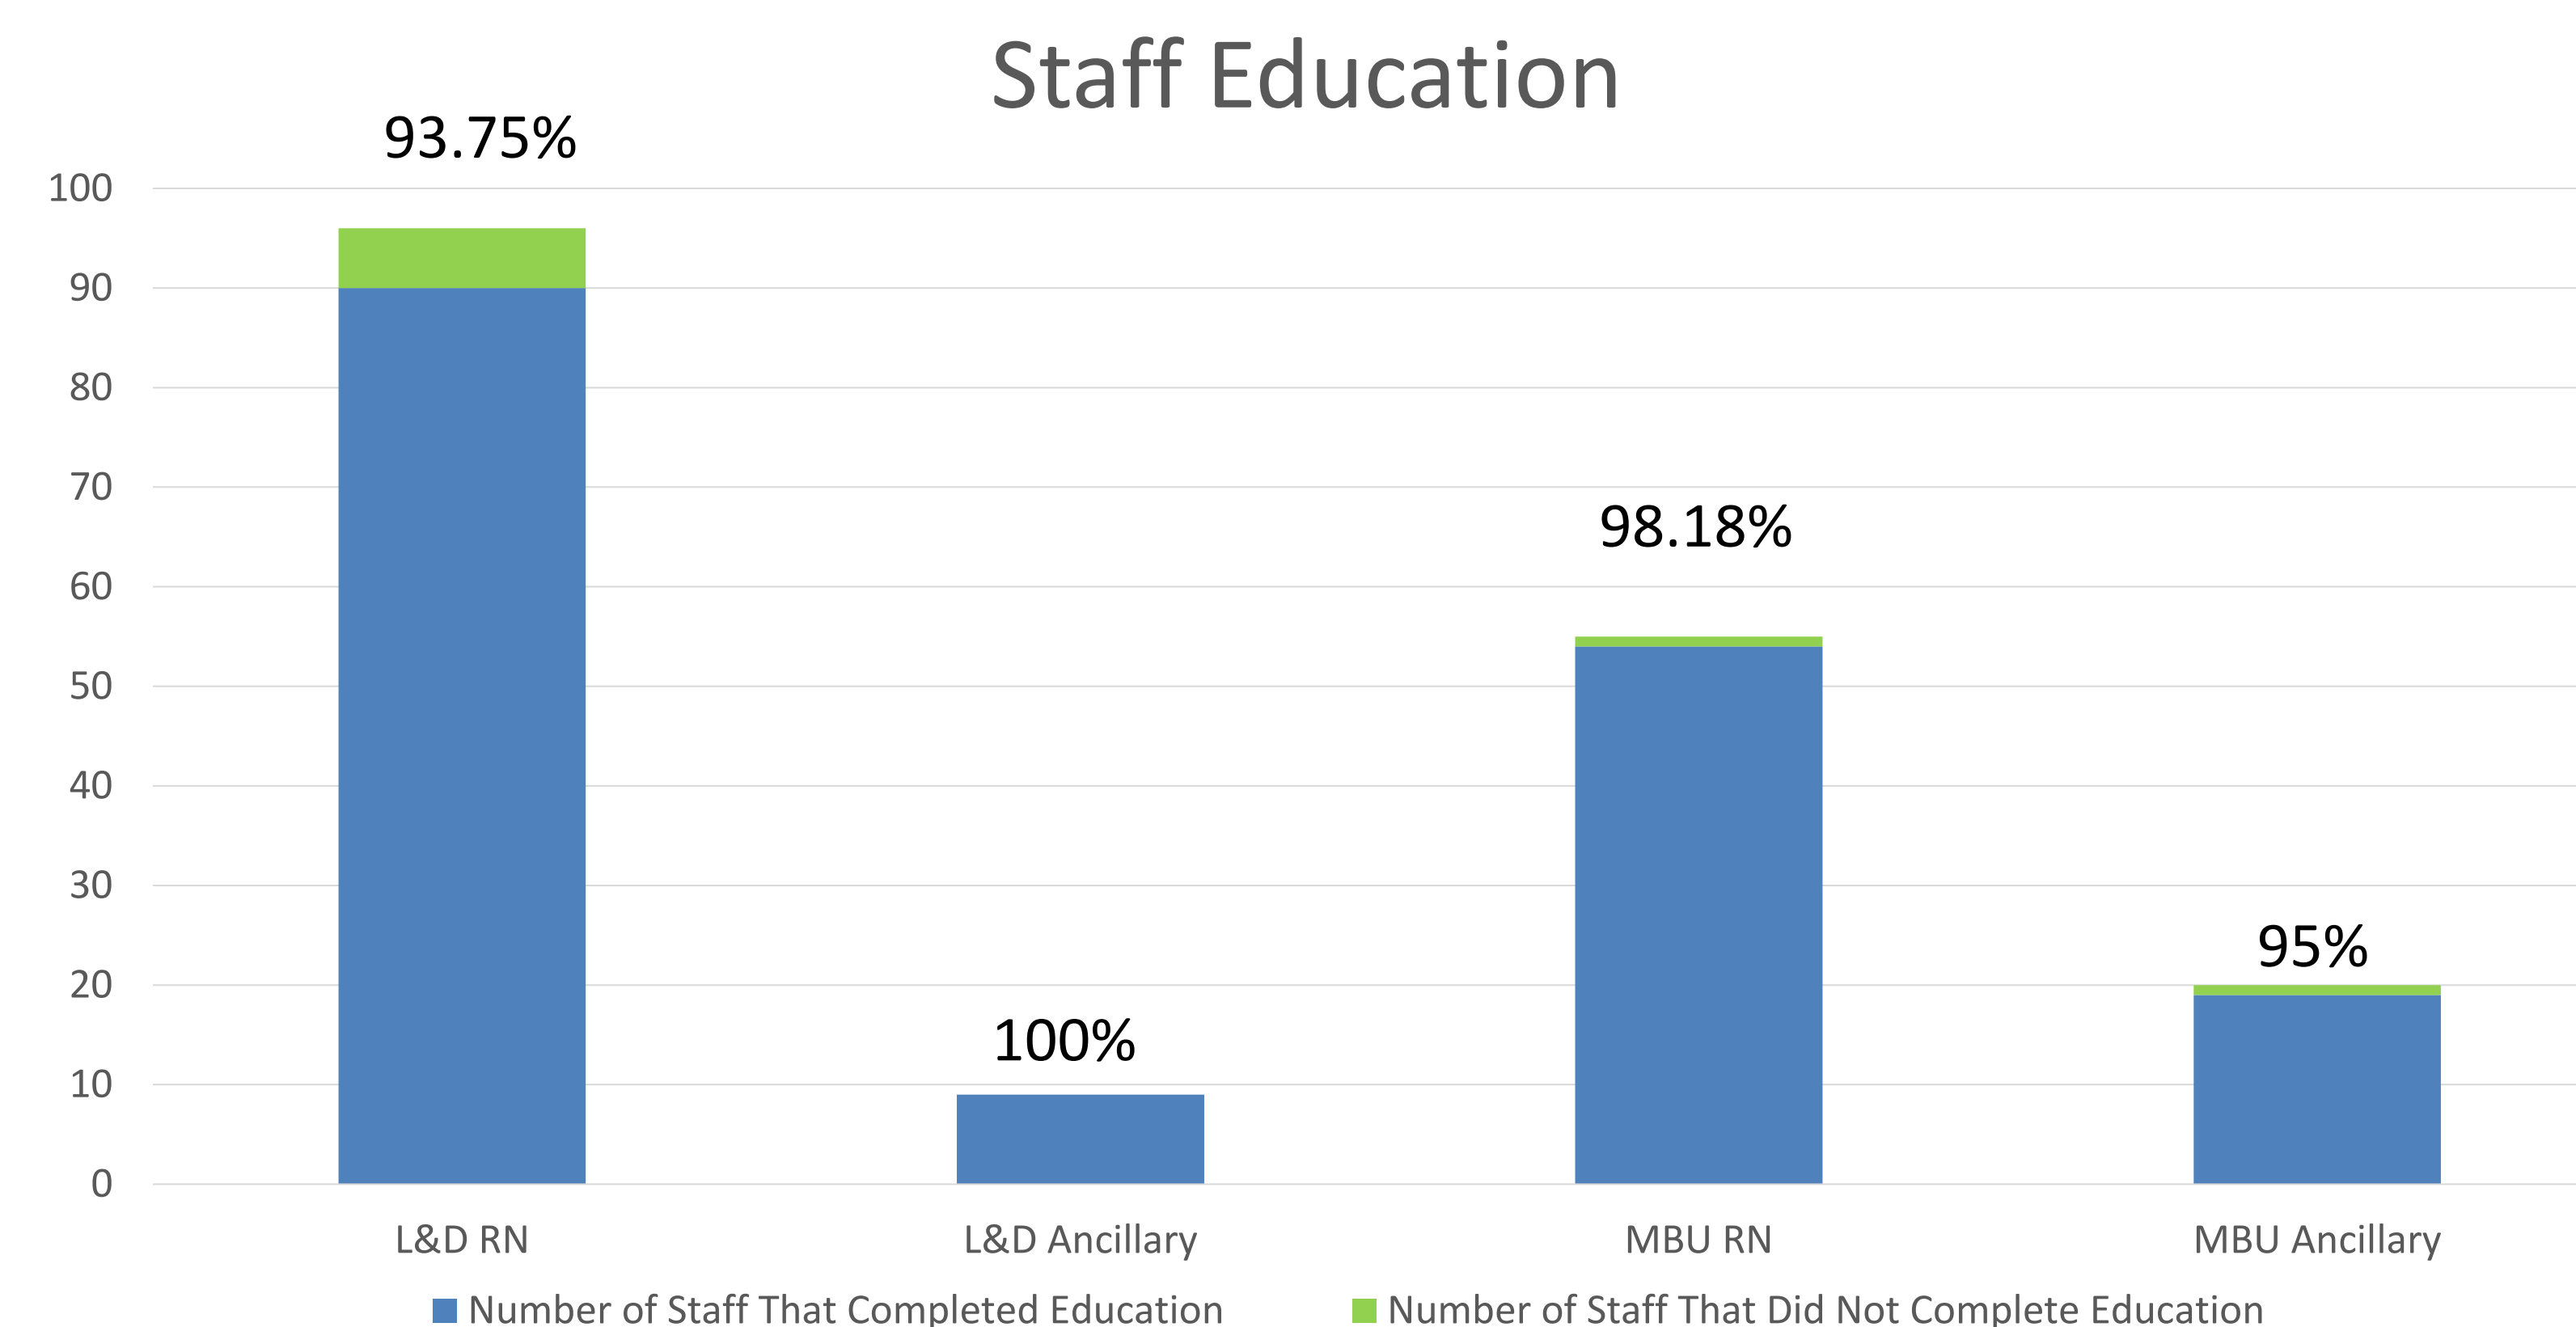

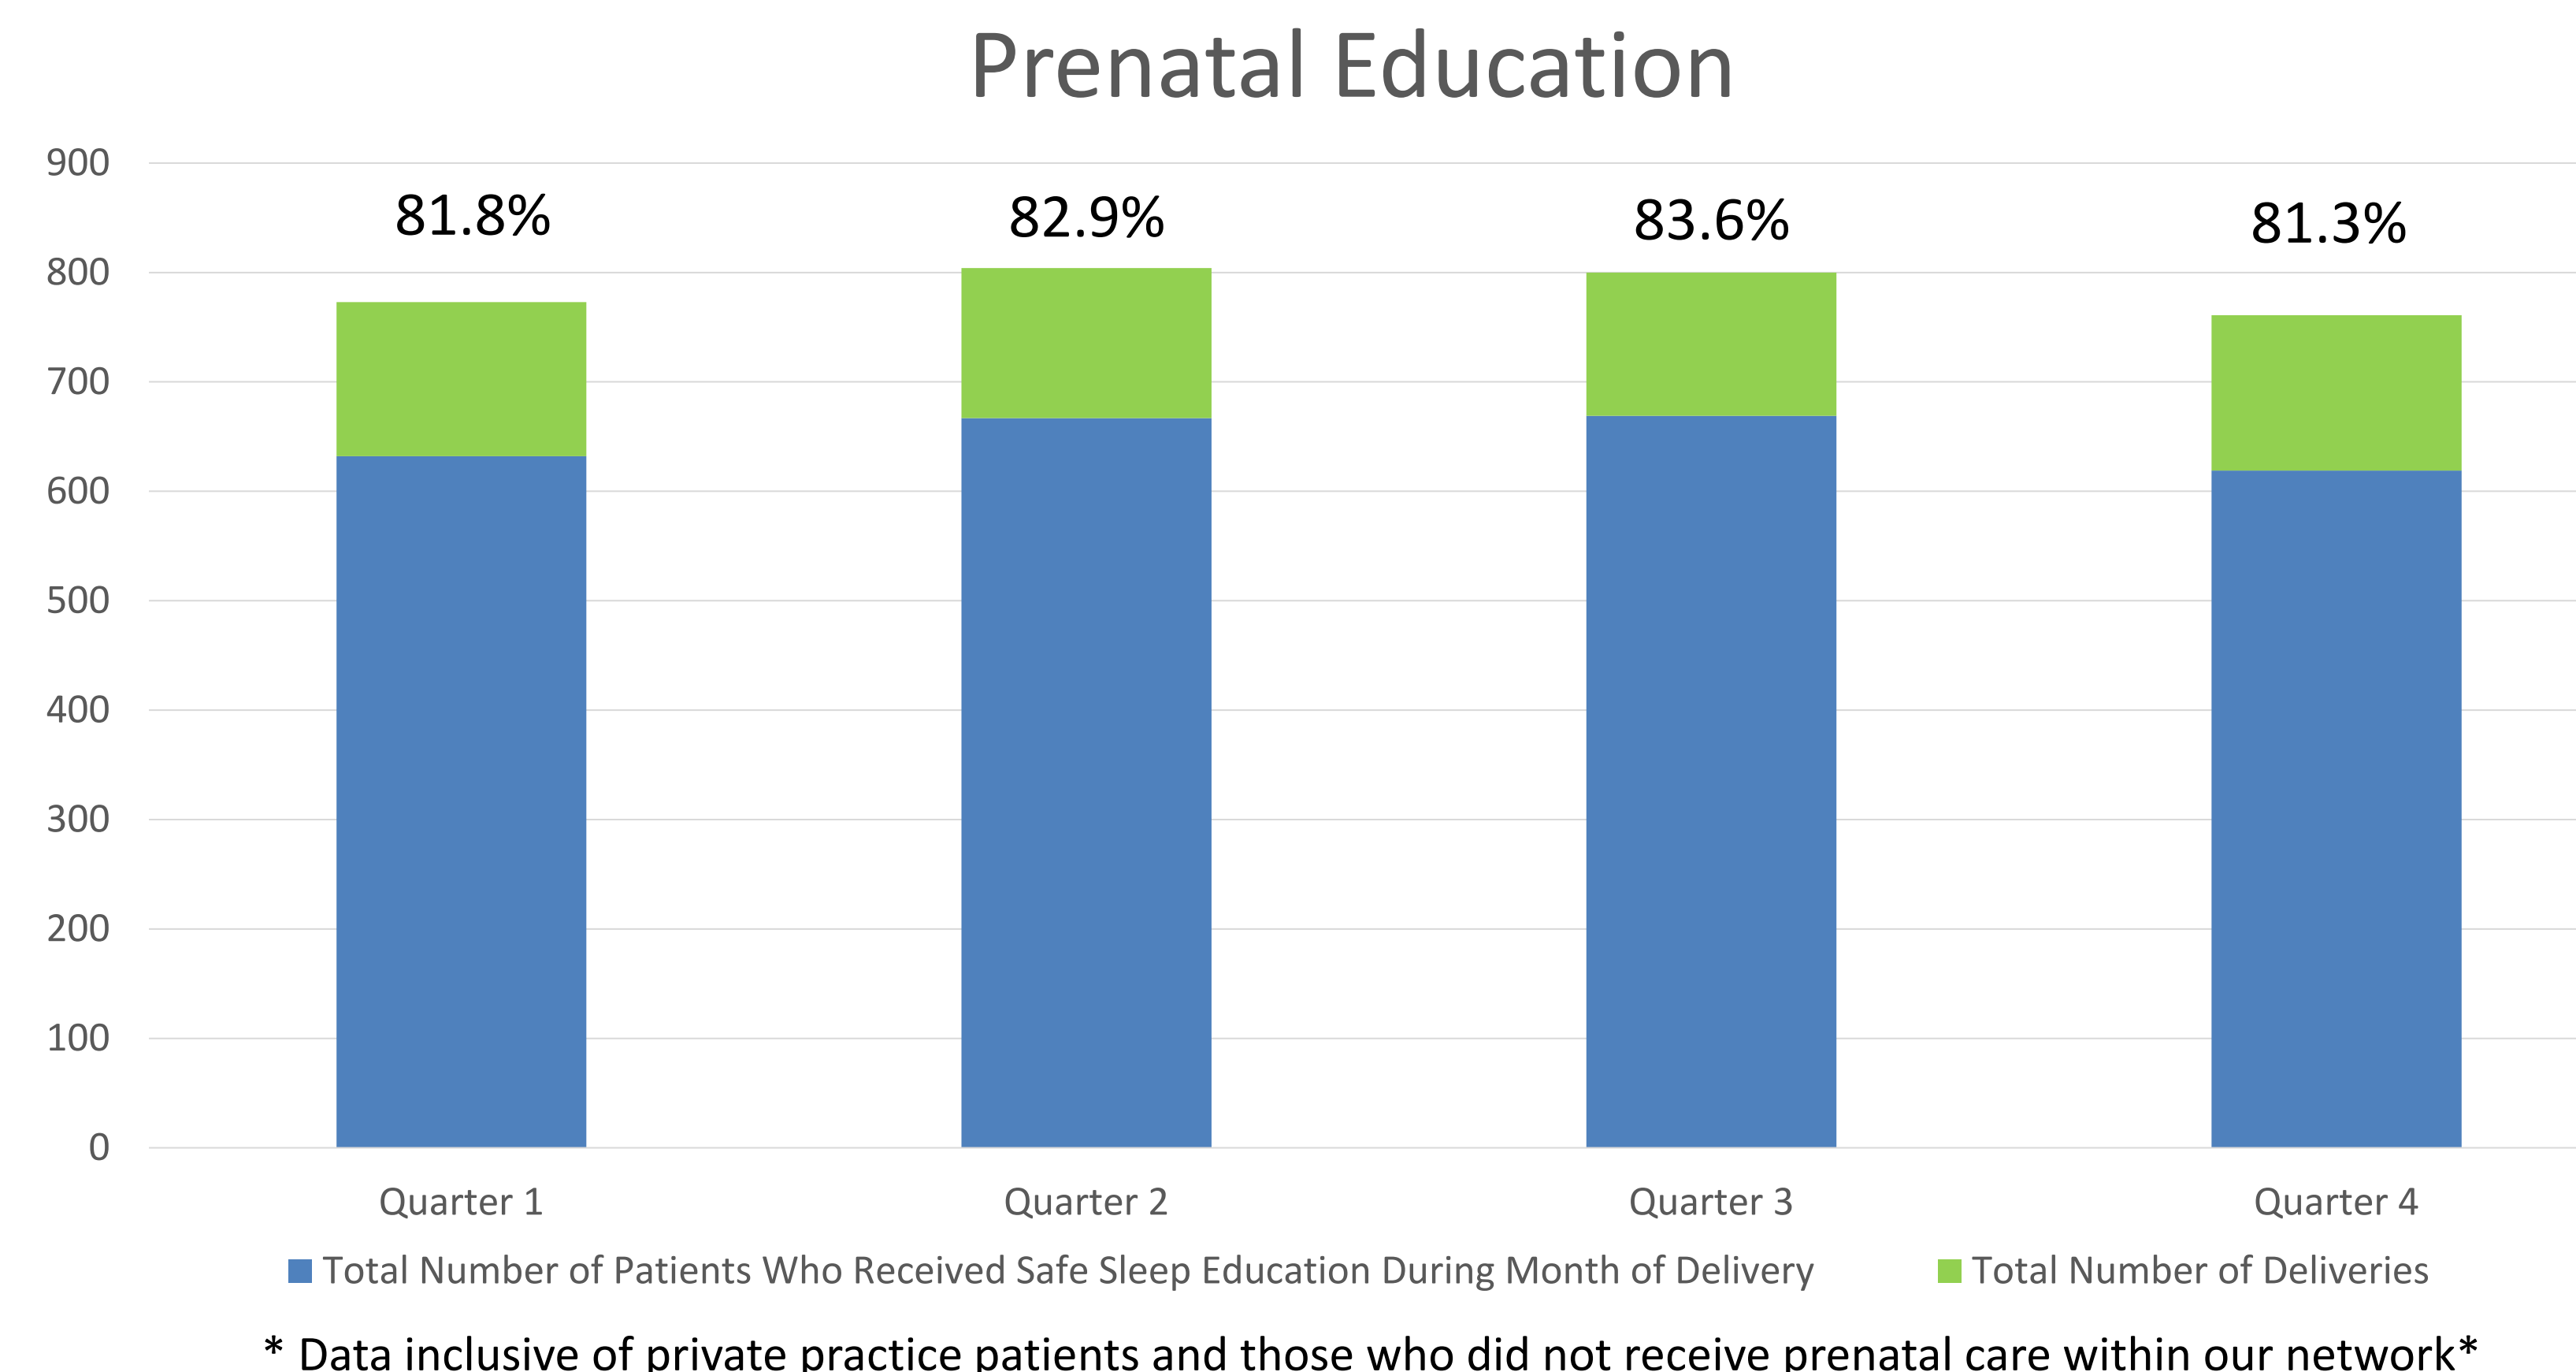

- Inconsistent prenatal education and lack of available translations of safe sleep information
- Inconsistent modeling of safe sleep practices in the inpatient setting

Focus Area and Key Interventions

- Education provided to inpatient families
 - Collaborated with PA Safe Sleep program to provide consistent education to our inpatient population.
 - Education is available in 29 languages via a QR code!
- Education to inpatient staff regarding role model behaviors and how to properly educate families
 - PA Safe Sleep educational modules provided for all staff
 - Conducted pre and post education environmental audits to observe if safe sleep practices are occurring

Measures and Results

Patient Voice

- Presented education to Obstetric Family Advisory Council for qualitative feedback
 - Council had positive comments regarding printed material but also asked for safe sleep video

Status and Next Steps

- Entering last phase of PA Safe Sleep Program
 - Survey to staff regarding education retention
 - PA Safe Sleep environmental audits
